Our bespoke service gives the customer full control throughout the entire design and manufacturer process. We stock a comprehensive range of colours and frames with endless configurations.

We work with you to bring your vision to life.

Our sliding doors are multi-purpose, and can fit any space up to 2.48m height & 5m wide. You can adapt your storage space with our range of end panels giving you the freedom to choose your opening sizes. Additionally, you can personalise your internal storage with our wide range of shelving (2070x400), kept in stock in a range of colours giving your wardrobe a sleek look.

ELEGANCE
THAT TOUCHES
EVERY ASPECT
OF YOUR
HOME

WHY WE ARE THE PERFECT FIT FOR YOU . . .

COMMITMENT TO QUALITY

Adamson Sliding Doors have built and maintained an enviable reputation for quality and outstanding service for a wide range of clients and projects throughout the country. Our manufacturing process is hand-made and thorough, ensuring precision for the perfect fit.

We work from our own factory which is staffed by a highly skilled team of experts who are committed towards our goal- to guarantee all work is completed to the highest standard.

From start to finish, your experience will be first class, our high quality products are equally matched by our in-house staff who will support you throughout your journey.

MADE TO MEASURE DOORS

With an extensive range of mirrors, coloured glass and wooden panel finishes you're sure to create a door combination that fits your style and measurement requirements.

Our made to measure sliding doors include; classic frames and shaker frames. By providing a choice of materials we can ensure that our customers have the best possible options for their creations.

QUALITY SLIDING SYSTEM

High quality rollers are mounted to the top and bottom of the door. Our doors are bottom weight bearing and roll along the track smoothly which is secured to the floor- unlike many systems which are hung from the ceiling by top rollers. We have a quiet top guide in place to ensure a reliable gliding action.

Compared to traditional hinged doors, sliding doors can save up to 500mm of floor space.

CLASSIC FRAME DOORS

DESIGNING YOUR CLASSIC FRAME DOOR

Our Classic Range offers versatile and quality doors, with a concave rounded shape for comfortable opening and closing.

Choose your frame finish, then either compliment with matching wood effect panels or make a bold statement with contrasting wood colour or glass panels in any combination.

The Classic Range will meet your demands whether it's a traditional or contemporary style you prefer.

WARDROBE MEASURING DETAILS

It's surprisingly easy to install our bespoke sliding doors. Simply measure the space you're going to use for your wardrobe, give us your measurements and we'll make your fitted doors. Once manufactured, fit your bottom and top tracks, slide and lock your doors into place. That's it! A beautiful and stunning wardrobe in a few simple steps.

Fitting to ceiling and wall to wall. Measure your opening height and width at the five points indicated on the diagram. (Please note: Take into account any obstructions such as coving, skirting, radiators etc. either remove them or build an unobstructed opening around them).

HEIGHT: If there is any difference between the measurements of A, B or C, this means that your ceiling and floor are not parallel. Your track sets will allow for a difference of +/- 12mm. Doors will be made to fit the smaller of the 3 height dimensions.

WIDTH: Walls should be as vertical, and parallel as possible when adjustment in the door is needed. Doors will be made to fit the larger of the two width dimensions.

Fitting to a doorway or window opening

Fitting with a side panel

Reducing your ceiling height (if room is higher than 2480mm)

END PANELS

IN STOCK NOW

Create your ideal space with end panels
